

WHAT IS CLAIMED IS:

1. A blue tooth hard disk receiver for wireless receiving and storing image data; the blue tooth hard disk receiver comprising:

5 a first blue tooth module for receiving image data from an external device having a second blue tooth module; and

 a hard disk drive for storing image data transferred from the first blue tooth module.

10 2. The blue tooth hard disk receiver as claimed in claim 1, wherein the external device is a blue tooth memory card.

3. The blue tooth hard disk receiver as claimed in claim 1, wherein the blue tooth hard disk receiver further comprises a casing, a circuit board, a microprocessor, an IDE conversion interface, a USB interface, a power supply module and a battery.

15 4. The blue tooth hard disk receiver as claimed in claim 1, wherein the data received by the blue tooth hard disk receiver is transferred to the hard disk drive through an IDE conversion interface.

5. The blue tooth hard disk receiver as claimed in claim 1, wherein the blue tooth hard disk receiver is connected to one of a computer and a
20 notebook computer through a USB interface; data in the hard disk drive is transferred to the computer or the notebook computer through the USB interface.

6. The blue tooth hard disk receiver as claimed in claim 5, wherein the data in the hard disk drive is cleared by the USB interface.

25 7. The blue tooth hard disk receiver as claimed in claim 1, wherein the first blue tooth module in the blue tooth hard disk receiver is connected to a third blue tooth module in one of a computer and a notebook computer so as to wirelessly transfer image data to the computer or the notebook computer.
